

# eduroam on Android devices with username/password Stand: b'22. Februar 2024'

## 1 Four-step quick guide

- You already have configured eduroam on your device? Delete the configuration.
- Install geteduroam from Google Play.
- Run the app and follow its instructions.
- If the wifi eduroam does not work, please delete all profiles "hu eduroam" in your wifi settings and run the app again.

## 2 Preface

This guide was created and testet with a Pixel 6a running Android 13. It should work with any Android device (with Android 8 or higher). If you're using an older version of Android or you don't use Google Play, you will find

more ways to set up at https://cat.eduroam.org/.

If you still have installed the old HU-eduroam app, please uninstall it.

# 3 Installation of the HU Berlin eduroam app

You find the installer app on Google Play via https://play.google.com/store/apps/ details?id=app.eduroam.geteduroam.

eduroam on Android devices with username/password

When the app is installed, please run it. Tap on the icon with the magnifying glass.

Search for Humboldt-Universät zu Berlin.

BenutzerberatungTelefon:2093 70000eMail:cms-benutzerberatung@hu-berlin.de

Confirm Humboldt-Universät zu Berlin as your institution.

Need help? <u>Click here for support</u>	
	1

Enter your HU account followed by **@hu-berlin.de** *This is NOT the e-mail address.* and your password. Click **Connect to Network** to continue.

Please confirm the prompt **Safe this network?** with **Safe** at the bottom right.

You can now connect to the wifi *eduroam*.

For an initial installation, after exiting the app, a **Allow Wi-Fi networks suggestions?** will appear. You can click **Allow**, but this has no effect on the already configured *eduroam* connection.

# 4 Handle Errors

### 4.1 Remove the APP and saved networks

In some cases the APP and *eduroam* wifi profiles should be removed. Only ONE existing eduroam profile is effective for the function!
