

chktex - a LaTeX linter

1. This will only take 2-3 unpleasant minutes to read.
2. Have you every read equations like

$$42 = 3 \times (10 + 4) \quad (1)$$

or

$$\sin(x)^2 + \cos(x)^2 = 1. \quad (2)$$

3. Do you read on your PC? Maybe you read texts with abbrev. a lot?
4. I could go on forever ...
5. In `beamer` you use `\only<2-3>{<TEXT>}` to show some information only on the second and third overlay of a frame.

Note that 1 is an estimation.
